I am a mid-level Frontend Developer, building engaging and functional user interfaces powered by the latest technologies, including JavaScript frameworks like React and Next.js, as well as HTML, CSS, and some backend programming languages.

I have worked in agile environments using the Scrum methodology, collaborating with multidisciplinary teams and cross-functional groups. Currently, I develop solutions for an international project that provides a product focused on quantitative and qualitative research.

With experience in both consulting firms and product-based companies, I have developed strong problem-solving, teamwork, and innovation skills, gained through working on diverse teams and projects.

Professional Background

Frontend Developer
SMT Soluções em Tecnologia | São Paulo - SP - Brazil | october 2023 - moment

- Actively contributing to the PlaybookUX project, an international platform for qualitative and quantitative research that connects companies with real users, facilitating usability testing, video interviews, and in-depth insight collection to improve products and services.
- Developing new features and enhancements for websites, collaborating with cross-functional teams to implement solutions that enhance user experience and meet project-specific requirements.
- Maintaining and optimizing existing websites by applying updates, bug fixes, and performance improvements to ensure seamless functionality.

Frontend Developer
Magazord Tecnologia | Rio do Sul - SC - Brazil | november 2021 - september - 2023

- Developed new features and functionalities for websites, collaborating with design and development teams to implement solutions that enhanced user experience and met the project's specific requirements, using technologies such as JavaScript, TypeScript, SASS, Styled Components, Twig, jQuery, and React.
- Refactored existing features into React, significantly improving usability.
- Actively contributed to the development, redesign, and creation of pages based on Figma prototypes.
- Performed ongoing maintenance of existing websites, applying updates, fixes, and improvements to ensure optimal functionality and performance.

- Handled support-related tasks, understanding and resolving user requests accurately and efficiently.

Frontend Developer
Rota Seguros | Belo Horizonte - MG - Brazil │ august 2021 - october 2021

- Developed websites and landing pages using technologies such as HTML, CSS, and JavaScript.
- Performed maintenance and optimization of websites.
- Ensured continuous improvements in usability and user experience across mobile and desktop devices.
